The Elenchus: A Socratic Dialogue Workshop

Workshop Overview

This hands-on workshop is designed to help professionals like you master the art of Socratic dialogue—a powerful tool for facilitating meaningful conversations, driving innovation, and building trust within teams.

One goal is to ask questions that cause your partner to change. Not from being corrected or disagreed with, but from coming to terms with internal tensions. You want to help your partner grow on their own terms and by their own desires. As they say, real change comes from within. This is sometimes called "the elenchus," which is a Socratic technique that seeks discovery through collaborative dialogue.

Using materials and techniques developed at Intel, Stanford, and MIT, you'll gain practical skills to:

- Ask questions that uncover insights and resolve contradictions.
